

# The most productive cutting tables for packaging, wide format signage & display production

THE KONGSBERG C SERIES

# HIGHEST PERFORMANCE, DELIVERED BY THE INDUSTRY'S MOST SOLID PLATFORM

Kongsberg C Series is built for the highest performance, redefining the possibilites of digital finishing.

The Kongsberg C offers speed (100 m/min-66 in/sec) and acceleration (up to 1.7 G) with quick and precise tool movements, making high quality digital production possible, even under the tightest deadlines.

The Kongsberg C cutting table delivers an iconic performance that is made possible by state of the art, rock solid engineering. The cutting table utilizes aerospace technology, combining an aluminum composite tabletop, a rack & pinion drive system and dynamic table mapping. These features all ensure that the table provides the greatest cutting accuracy and consistency.

# **Introducing: Kongsberg C Edge**

Exceptional quality at a remarkable price. Step up your productivity with its high speed (75 m/min) and acceleration (1G), and astound your customers with impressive, high quality results and fast turnarounds.

As your company grows, the Kongsberg C Edge evolves with you and can be easily upgraded in both speed and acceleration.

Kongsberg C66

# REDEFINING THROUGHPUT WITH HIGH PERFORMANCE TOOLING

The Kongsberg C performance range works with a wide variety of optional tool units. Multiple tool combinations are available during production, depending on the materials you want to process. The tooling system includes a material thickness probe and an optional camera for registering printed and unprinted material. The Kongsberg C performance tooling increases throughput and quality.

# VariAngle Tool

The unique VariAngle Unit is a V-notch cutting tool that cuts at any angle between 0° and 60°.

- > V-notch cutting with different angles no longer needs operator intervention. It's a huge time saver.
- > Unlocks new creative potential for designers of POP displays.
- > Minimized operator handling eliminates safety issues.

# 1. Heavy Duty Tool Position

The Heavy Duty Tool can handle:

- > Large-size crease wheels for recycled liners and heavy duty boards
- > V-notch inserts for triple wall corrugated, honeycomb boards and solid
- > 50 kg down force for the best creasing and perforating results
- > Straight-blade knife insert for long, straight cuts in heavy-duty boards
- > Crease blade insert for polypropylene boards
- > High-Power Milling Unit
- Foam Cutting Unit
- > The optional Dual Heavy Duty Unit combines two independent wheels in one heavy-duty unit. This unit makes it possible to cut, crease and perforate a single job without the need to change tools.

## 2. Insert Position

- > Drill Tool Insert
- > Ballpoint Pen Insert
- FiberTip Tool

# 3. Fast Tool Position

- > High-frequency VibraCut Tool, VibraCut Tool and CorruSpeed Tool Reciprocating and static tools for corrugated board, ranging from micro flute to triple wall, paper core boards, foamboards and thin foam panels
- > Hi-Force Knife Tool, Psaligraphy Tool and RM Knife Tool Static knife tools for compact materials; paper, folding carton, solid board and synthetic sheets such as PVC, polypropylene, polycarbonate, etc.
- > PressCut Tool Tool for adhesive vinyl, with programmable blade pressure
- > RotaCut Tool Motor-driven, rotating knife tool for textile materials
- > Braille Tool Tool for making braille signs, works together with milling tool

Rigid signage

Folding carton

2D or 3D shapes or structures in any material. Creativity is the only limit when producing on a Kongsberg C cutting table.

# INCREASED THROUGHPUT BY SMART AUTOMATION

# MultiZone production

MultiZone production allows you to load two sheets at the same time and maximize the production capacity on your Kongsberg cutting table without expensive automation add-ons.

The MultiZone Operation Mode enables the operator to prepare one zone while the table processes the other, with automatic change-over when one zone is completed, vastly increasing overall productivity and throughput.

An optional zone control panel can be mounted on the table's side cover, providing a time-saving way of acknowledging that the zone is ready for production and also manual vacuum hold-down control.

# **Barcode** production

Ensures consistent production, final quality and is especially recommended when several unique jobs are lined up. The camera will read the barcode automatically and apply the correct tooling and production settings.

- ) QR
- Data Matrix
- > Code39
- Multiple stacks support
- MultiZone support

# Robotic automation brings a new world of opportunities

Robotic material handling brings cutting edge industrial automation to the shop floor. The robotic arm loads and unloads material automatically with perfect alignment to support pallet-to-pallet production and runs unattended.

The grippers are able to work with a wide range of materials and the cutting uptime is maximized to its full potential.

Cells can be fully configured to your needs. Future expansion is always an option without the need for heavy re-investment when your business demands more.

## **Sheet automation**

The Kongsberg Automate Board Feeder and Stacker is an easy to use pallet-to-pallet material handling solution. With a stack height at 915 mm/36 in and quick automatic load cycles it's the optimal solution for production in all typical packaging and display materials. Combined with he Underside camera, you are assured of full registration on every sheet leaving no room for error.

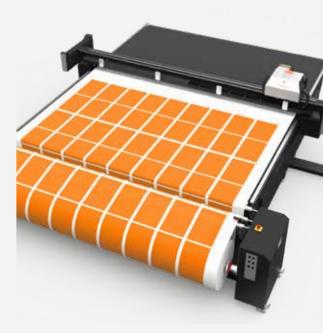

We understand that quality is paramount throughout your production. The Kongsberg board feeder eliminates the chance of damage encountered with manual handling, and ensures that the print moves to the cutting table with precision and care.

# The Motorized Roll Feeder for soft signage

The roll feeder ensures consistent feeding of material onto the table's conveyor belt, even if the roll is imperfectly rewound after printing.

With capacity for large, heavy rolls and handling mechanisms for challenging substrates, the motorized roll feeder is vital to achieve uninterrupted production with high quality output. Combined with our Take Up Unit true roll-to-roll production can be fully supported.
