

The most versatile cutting tables for signage, displays & packaging

—
THE KONGSBERG X SERIES

Kongsberg X

COMPLEX PRODUCTION MADE EASY ON THE INDUSTRY'S MOST FLEXIBLE PLATFORM

In a world with rapid technology changes, it is important to invest in equipment that offers the flexibility to grow in-line with your business needs.

With the Kongsberg X you can invest in the equipment you need today with the confidence that you can easily upgrade as your business grows. Add new materials, new applications, or more capacity so that you can add volume and enter new market segments.

Shared Resources

Simplifying is also replacing complex manual tasks with automation. The Shared Resources functionality in i-cut Production Console analyzes incoming files and automatically selects the right tool, the correct table settings and the cutting sequence.

The result? A fast and consistent production, no matter who operates the table. You no longer need to wait for the most experienced operator to produce the complex jobs and ensure consistent results.

With Shared Resources, you can deliver the short turnaround time your customers demand.

Steel construction tabletop

Built upon aerospace technology, the Kongsberg X series features rock-solid Kongsberg tabletop construction that will never warp, even after decades of heavy use.

KONGSBERG X SERIES: 3 APPLICATION KITS FOR VERSATILITY

Whether you produce 2D signs, 3D displays or packages; regardless of the material you work with, the Kongsberg X cutting table will meet the challenge.

The application kits for the Kongsberg X (Short Run, Production and Flexo) make it easy to pick the right configuration for your business. Additionally, the freedom of upgrade options make the possibilities almost limitless.

Kongsberg X Short Run

- › For sample making, short run production and other packaging-related tasks
- › Production on a wide range of materials with fewer manual tool changes
- › Extra fast tool loading, auto recognition and calibration
- › Available with felt or PVC underlay

Kongsberg X Production

- › For signage, packaging or displays production
- › Great quality for any job or application
- › Ability to add a conveyor system to support automated board & roll loading
- › A variety of milling options to match your throughput requirements
- › Perfect print-to-cut registration

Kongsberg X Flexo

- › Cutting of flexo plates and patches
- › Operates back to back with your imaging device, physically and digitally
- › Fits in a truly tailored workflow defined with Esko's Digital Flexo team
- › Can also be equipped to produce dedicated shipping boxes for your finished plates

OR START YOUR DIGITAL FINISHING WITH THE KONGSBERG X EDGE!

The Kongsberg X Edge is the entry level version of the Kongsberg X.

The Kongsberg X Edge delivers **speeds of 30 m/min** with acceleration of **0.3 G** and can handle the full spectrum of display, signage and packaging materials.

Field upgradeable: Add power as your company grows

The Kongsberg X Edge can be upgraded to a full Kongsberg X table. As your company grows, the Kongsberg X Edge evolves with you and can be **easily upgraded** in both **speed** and **acceleration** to ensure it keeps up with your business demands.

- ☑ High production speed
- ☑ Exceptional cutting quality

- ☑ Fully upgradeable
- ☑ Remarkable price

KONGSBERG X TOOL HEADS: POWERFUL AND VERSATILE

MultiCUT-HS / HP

The MultiCUT-HS spindle is the perfect option for a shop who want to support a wide variety materials and applications with minimal change over time. The head allows you to jump from kiss cutting vinyl to milling ACM without the need for any manual intervention and still delivers an extremely high-quality finish.

The MultiCUT-HP (High Power) is equipped with a super-strong, liquid-cooled milling spindle delivering several times higher productivity than less powerful alternatives. This is a great choice for shops who need extended milling duty cycles and/or who work extensively with heavy-duty materials (thick sheets of acrylic, wood/MDF and aluminium composite material).

FlexiHead

The FlexiHead offers highly accurate, powerful cutting on all flexible and thin materials (paper, folding carton, textile, vinyl...). Three configurable tool stations accommodate a full range of standard tool inserts. Specially designed knife and crease tool inserts are available to produce folding cartons with the same high throughput as corrugated jobs.

PowerHead

The PowerHead excels on heavy duty material (honeycomb boards, triple wall and recycled board...). It features 150 mm (6") diameter crease wheels and additional scoring pressure with the equivalent of 50 kg (110 lbs) down force. The large wheels enable creasing high recycle content boards without breaking the liner. The knife adapter also offers V-notch cutting, enabling mitered and extremely precise folds when producing heavy-duty containers and paper core board displays.

FoamHead

The FoamHead uses a reciprocating knife to handle foam materials with a maximum thickness of 86 mm [3 3/4"]. With serrated-edge blades, it can also manage thick honeycomb paperboard. Three blade adapters control the blade length so it can be matched to material thickness. And, it is easy to program accurate partial through cuts thanks to the advanced Z-axis control.

BITS & BLADES THAT MAKE A DIFFERENCE

Quick and error free tool exchange

Exchanging tools on a Kongsberg X is fast, simple and error proof. Just insert a tool and hit Start. Every tool is identified by a unique bar code with tool parameters stored in memory, preventing any operator errors.

Psaligraphy knife tool for the finest details

The Psaligraphy knife tool easily cuts any intricate detail in paper and folding carton, at a unprecedented quality level. Make products like greeting cards, invitation cards, promotional items and folding carton samples with high precision, burr-free cuts.

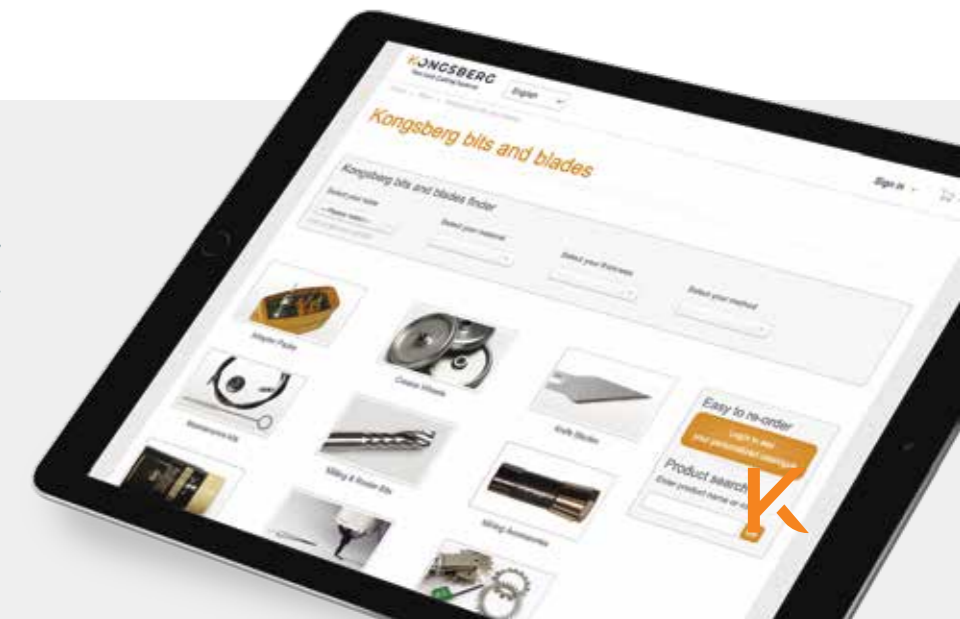

CorruSpeed tool for the best quality

The CorruSpeed is a high impact tool for corrugated materials. It cuts without oscillating and delivers amazing quality at full machine speed. Corruspeed handles material thickness up to BC flute.

Buy bits & blades online

Quickly order the right bits and blades for the right material on the Kongsberg Store. Use the intelligent bit & blades finder on www.kongsbergstore.com

KONGSBERG **AUTOMATE**

Boost the performance of your Kongsberg tables with hardware automation options.

Sheet automation

The Kongsberg Board Feeder (iBF) is an easy to use material handling solution.

We understand that quality is paramount throughout your production. The Kongsberg Board Feeder eliminates the chance of damage encountered with manual handling, and ensures that the printed media moves to the cutting table with precision and care.

Automated roll feeding is also available and can be fully integrated with sheet feeding to meet production volume needs with diverse material requirements sheet automation is available for Kongsberg X and Kongsberg X Edge.

Automated handling of flexible materials

The Kongsberg Take Up Unit and Roll Feeder for flexible materials makes roll-to-roll workflows easier. The unit makes finishing digitally printed jobs on rolls, and collecting waste, very straightforward.

The Take Up Unit is simple to install for any Kongsberg table equipped with a conveyor feed system. The unit is hassle-free to operate and can easily be moved away when it's not needed.

MultiZone production

MultiZone production allows you to load two sheets at the same time and maximize the production capacity on your Kongsberg cutting table without expensive automation add-ons.

The MultiZone Operation Mode enables the operator to prepare one zone while the table processes the other, with automatic change-over when one zone is completed, vastly increasing overall productivity and throughput.

An optional zone control panel can be mounted on the table's side cover, providing a time-saving way of acknowledging that the zone is ready for production and also manual vacuum hold-down control.

AN UNSURPASSED USER EXPERIENCE

User Experience personalized

The i-cut Production Console, the front-end for the Kongsberg X, works with a graphical icon based communication which allows the operator to supervise production from a distance. A separate operator login ensures personalized language settings and job list management.

My Job List

Full editing rights from estimating and production planning to job countdown increase efficiency and ensure on time delivery. Previous jobs can be recalled from history and reproduced exactly as before with the click of a button.

Barcode production

One-piece-flow by barcode production ensures consistent production and final quality. Especially recommended when several unique jobs are lined up. The camera reads barcodes and automatically applies correct the tooling and production settings.

Overall dimensions w/ RWS (1)(2)	3600 x 2160 141¾ x 85	3600 x 2950 141¾ x 116	3600 x 3960 141¾ x 156	4070 x 3960 160¼ x 156	4070 x 5640 160¼ x 222	4070 x 7320 160¼ x 288¼	mm in.
Weight	455 1000	525 1150	630 1390	815 1800	1150 2540	1485 3270	kg lbs
Position accuracy (3)	±200 ±.0078		±250 ±.0098	±300 ±.012	±350 ±.014	±400 ±.016	µm in.
Repeatability	±50 ±.0019			±60 ±.0023			µm in.
Maximum speed	Kongsberg X Edge: 30 m/min – 20 in/sec Kongsberg X: 50 m/min – 33 in/sec						
Maximum acceleration Kongsberg X Edge	3 m/s ² - 0.3 G						
Maximum acceleration Kongsberg X (4)	5.6 m/s ² - 0.56 G			5.4 m/s ² - 0.54 G			
Vertical tool force	Standard tool stations: 220 N. PowerHead crease station: 500 N						
No. of vacuum sections	2		4				
Standard traverse clearance (5)	50 mm – 2" or 95 mm – 3 ¾", depending on Application Kit and model size						
Optional traverse clearance (5)	High clearance 95 mm – 3 ¾", available for models with 50 mm – 2" clearance as standard						

- (1) Measured with revolving workstation in its standard position
- (2) Conveyor feed option will add marginally to the length dimension
- (3) Applies across total work area, with standard traverse clearance
- (4) May be reduced with certain tool- and configuration combinations
- (5) Measured without cutting underlay. Max. cutting thickness is tool dependent. Ref. to Technical Specification booklet for further details
