

PLATE STORAGE

Why Plants Choose Flexopodz for Plate Storage

- **Maximize capacity:** Gain up to 2 times more storage in the same footprint with mobile carriages.
- **Speed up workflows:** Clearly labeled boxes and ergonomic access cut retrieval time dramatically.
- **Protect your plates:** Flat box storage prevents memory, cracking, and curled edges.
- **Grow as you grow:** Modular design expands easily as your inventory increases.
- **Tailored to you:** Highly customized layouts built around your current and future inventory.
- **Go beyond shelving:** Integrated inventory tracking system and durable storage boxes available.

SLEEVE STORAGE

Why Plants Choose Flexopodz for Sleeve Storage

- **Maximize Capacity:** Specially engineered shelving with mobile carriages delivers up to 2x the storage in the same footprint compared to the other guys —fewer shelves, fewer aisles, more space saved.
- **Speed Up Workflows:** Clearly labeled sleeve positions and ergonomic access cut retrieval time in half.
- **Protect Your Sleeves:** Vertical storage prevents warping and damage.
- **Grow as You Grow:** Modular design expands with your inventory.
- **Safety First:** ADA-compliant floor tracks and locking mechanical-assist handles make aisle movement safe and effortless.

STATIC STORAGE

Our static sleeve shelving is a cost-effective, floor-bolted system built for stability and always-open access—ideal for smaller sleeve inventories (roughly under 300 sleeves or plate sets) or facilities that aren't constrained on space. Even with fixed aisles, capacity remains highly competitive versus overhead hanging mobile systems because our nested shelf design maximizes usable shelf space. And as your inventory grows, the same system can be upgraded to mobile—so you can increase density later without replacing what you've already installed.

Average Capacity - 80 Sleeves per SleevePOD (3'Wx8'Lx12'H)

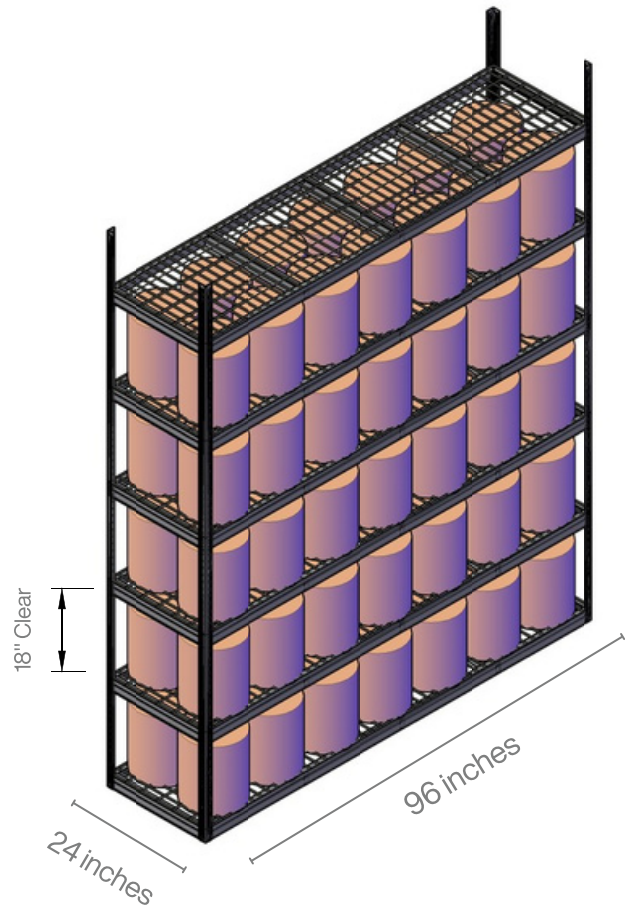

Average Capacity - 20 Plate sets per PlatePOD (Custom Size L & W, 6'H)

INK STORAGE

Built for ink inventory and daily pull-and-return workflows. Mobile carriages reduce aisle space, improve organization, and keep ink accessible—without expanding your storage room.

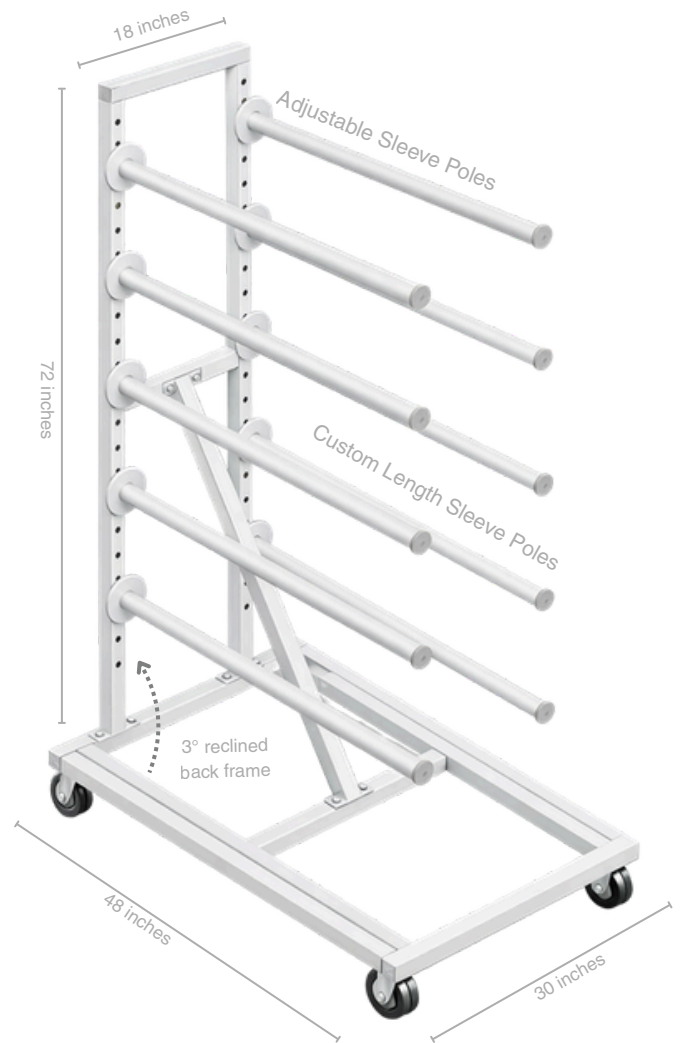

InkPOD 2'Wx8'Lx10'H
Average Capacity: 70 buckets per POD

NARROW HORIZONTAL SLEEVE CART

Small footprint, serious build. Our Narrow Sleeve Cart is engineered for high-frequency transport—easy to maneuver, stable when loaded, and durable enough for constant use. Adjustable sleeve poles give you a flexible layout, and each pole features a protective base plate that helps shield sleeve edges from the cart frame during handling. Powder-coated white steel and full swivel locking casters make it a clean, reliable solution for everyday sleeve runs.

COMPACT
ROBUST
MANUEVERABLE

A compact, ultra-maneuverable sleeve cart built for tight aisles and everyday transport.

VERTICAL SLEEVE CART

Our Vertical Sleeve Cart delivers warp-free, high-density sleeve storage. Sleeves can stay in the cart without worrying about warp, and the design holds significantly more sleeves than typical vertical carts in a compact footprint. It also streamlines daily handling and staging between storage, mounting, and press—and can be wrapped when needed to help protect mounted sleeves from ozone and light. (Maximum Sleeve Width is 66 inches.)

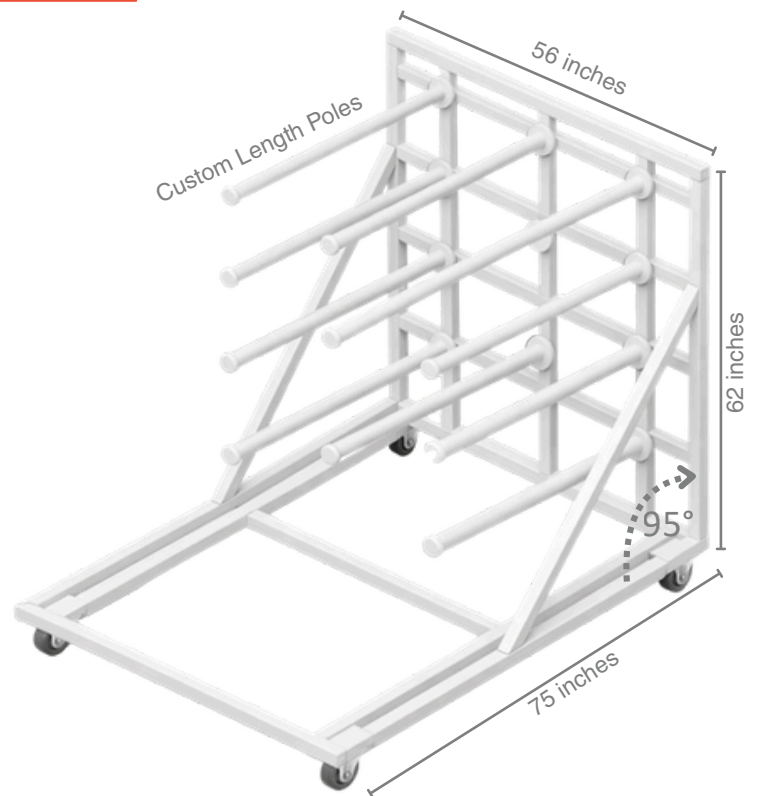

NO WARP DENSE STAGED

This cart is built to adapt with your workflow.

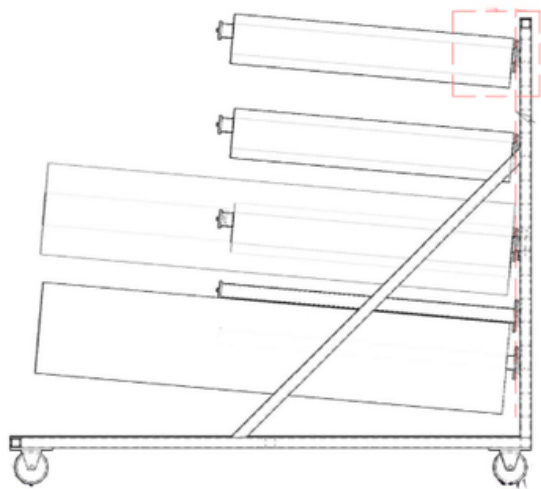

BASIC HORIZONTAL SLEEVE CART

Reliable, practical, and cost-effective, this cart delivers consistent performance shift after shift, giving your team confidence that sleeves will be protected and readily available. Built to balance affordability with long-term value, the Basic Horizontal Sleeve Cart is a straightforward yet essential tool for any pressroom focused on efficiency, organization, and smooth operations.

SIMPLE SECURE ESSENTIAL

This cart is designed to make sleeve transport effortless.

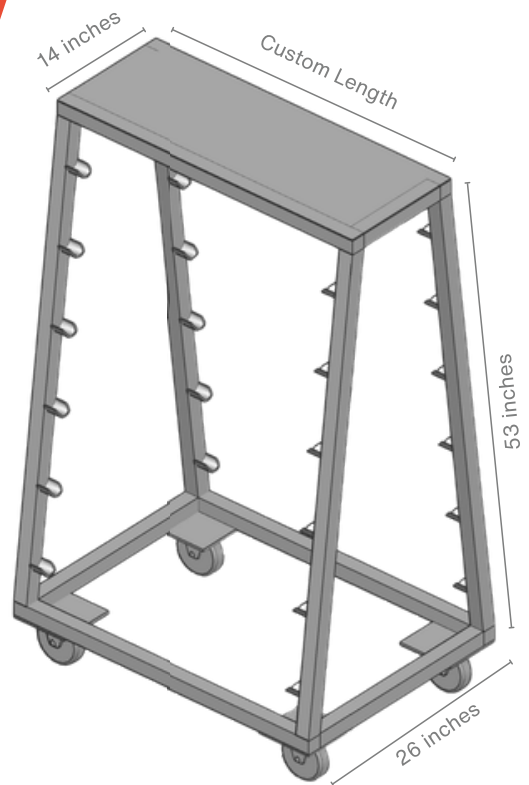

- Welded Sleeve Poles
- Custom Length Sleeve Poles
- White Powder-Coated Steel
- Large Frame
- Cost-Effective
- 5-Inch Locking Casters

ANILOX ROLLER CART

The Anilox Roller Cart is designed to safely transport or store anilox rollers in your facility. Built with a durable steel powder-coated frame and smooth-rolling casters, this cart makes it easy to move multiple anilox rollers at once while keeping them secure and organized.

SAFE
STRONG
MOBILE

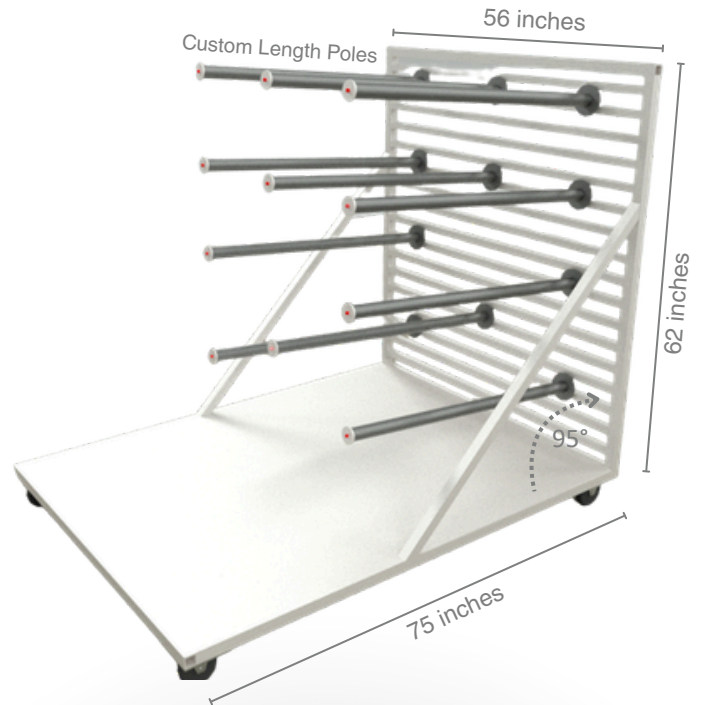

This cart keeps your anilox rollers protected while streamlining your workflow.

MODULAR HORIZONTAL SLEEVE CART

The Modular Horizontal Sleeve Cart is built for maximum flexibility in transporting sleeves and anilox sleeves.

Its ladder-back frame lets you place sleeve poles anywhere along the design and add more accessories as needed, so you can easily adapt it to fit your workflow. A solid steel powder-coated base adds strength and stability, while heavy-duty casters ensure smooth movement in your facility.

ADAPTABLE DURABLE MOBILE

This cart is built to adapt with your workflow.

Large Frame
Custom Ladder-Back Compatible Accessories
5 Inch Locking Casters

SAFETYPODZ & CARTS

A safer way to stage and handle heavy sleeves. SafetyPODZ use a solid steel base with either casters or bolt-down feet, plus a grid of attachment points so sleeve poles can be positioned to match your sleeves and workflow. Custom-length poles lock in securely, and when combined with our lift-assist recommendation, teams can handle heavy sleeves with far less risk and far more control.

Stable, configurable sleeve storage designed to cut lifting risk.

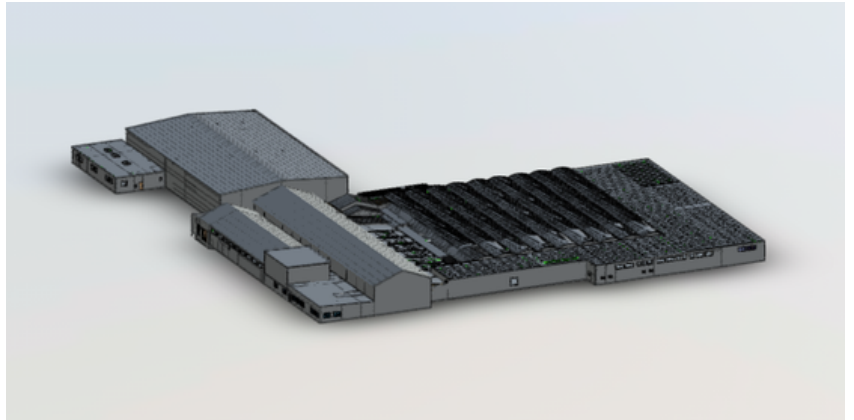

A lift-assist sleeve handler device can grip a sleeve, lift it, and rotate it 90°—switching the sleeve from horizontal to vertical (or back again) so sleeves can move safely without manual lifting.

We designed our SafetyPODZ to pair with a systems like this: the sleeves can be placed with as little as 1" of clearance around each sleeve, keeping the setup space-efficient.

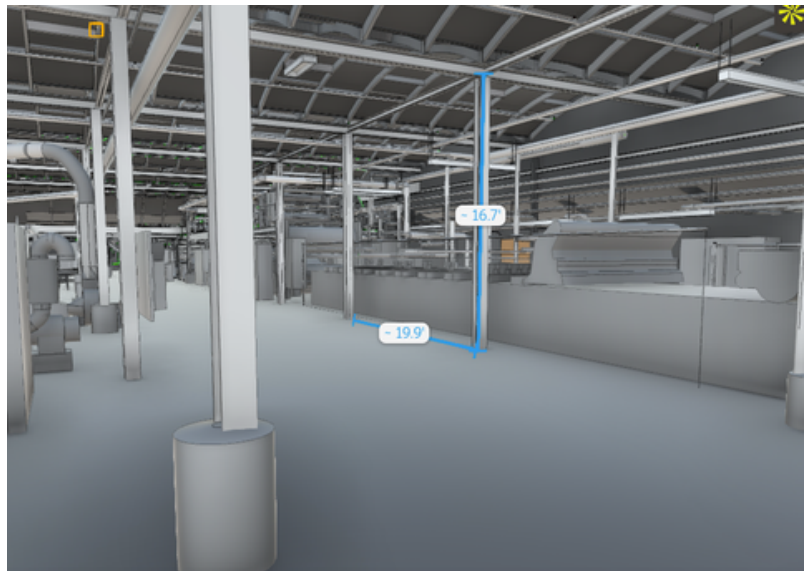

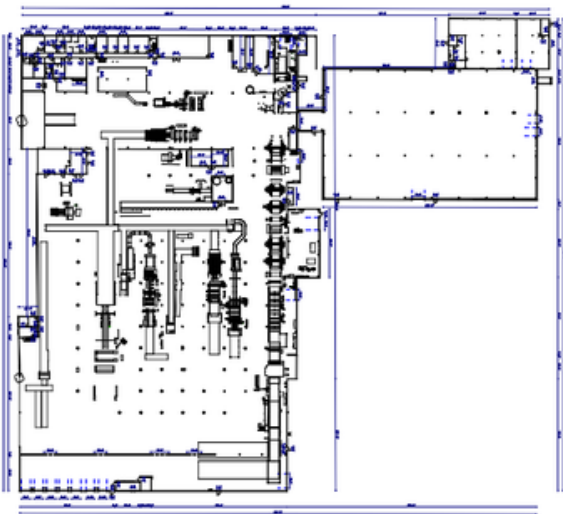

SPACE MAPPING SCAN

Our As-Built Digital Twin Scan captures your mounting department exactly as it exists today—equipment, clearances, aisles, and workflows—so we can plan changes with confidence. You receive a precise model you can open in Revit to measure, test clearances, and even move equipment around to explore layout options before making changes.

Make changes with certainty, invest with confidence.

FLEX-OPZ SOFTWARE

RFID / BARCODE INVENTORY TRACKING

Scan items in/out to keep live location, status, and ownership accurate—without manual logging.

FIND IT FAST

Swiftly locate materials with system-guided retrieval—no more time lost searching.

INVENTORY MAINTENANCE

Automatic notifications for destruction, reprint needs, and cleanup so inventory stays current.

FILLING ERP GAPS

FlexOpz fills the gaps your ERP can't cover—without ripping anything out.

CONFIGURED TO YOUR CURRENT REALITY

FlexOpz mirrors how you already work—then removes friction one step at a time.

REPLACE WORKAROUNDS WITH A SYSTEM

Stop living in spreadsheets, sticky notes, and tribal knowledge.

SEAMLESS SYSTEM INTEGRATION

Seamlessly integrate with current inventory management systems for streamlined operations.

REAL-TIME STATUS

Know what stage each job is in, what's waiting, and what's next—at a glance.

INTEGRATES WITHOUT THE PAIN

Connect where it makes sense and keep what's working—no big-bang replacement.

SMART SCHEDULING

Auto-prioritize and schedule work based on due dates, press assignments, and real-time status so the mounting team stays ahead of changes.

QC CHECKPOINTS

Build QC into the workflow with required checkpoints, photo notes, and pass/fail sign-offs so issues get caught before they reach the press.

AUTO-PLATEPODZ

The flexo plate tailored Vertical-Lift Module compresses plate inventory into the smallest footprint possible while streamlining retrieval to the point of use. By removing search time, travel time, and repeated handling, it reduces the labor burden of plate management and improves operational predictability. The payback is driven by measurable labor savings and reclaimed floor space.

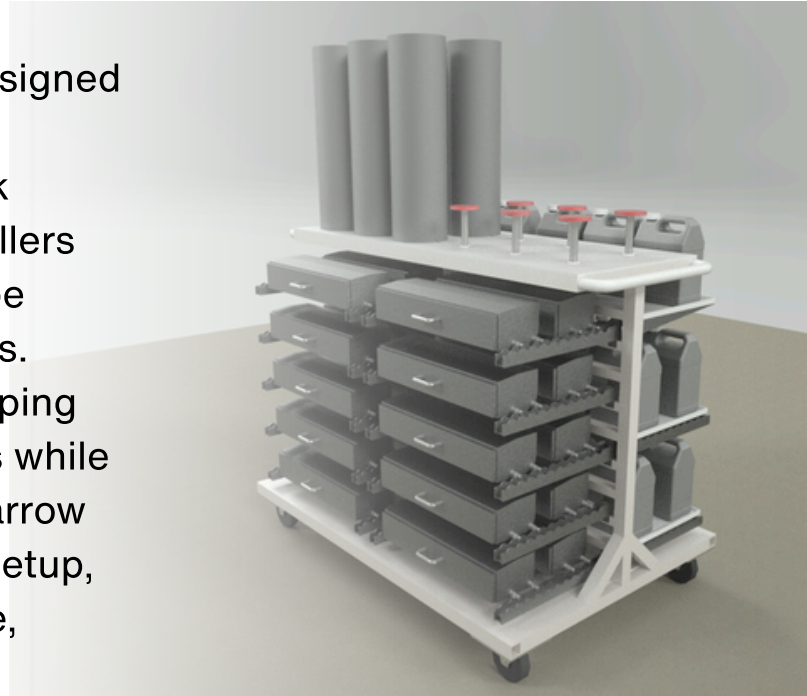

SPACE-SAVING LABOR-LIGHT ROI-PROVEN

Store more plates in less footprint and deliver the right tray to the operator—fast, consistent, and measurable.

JOB CART

Our Modular Narrow Web Job Cart is designed for maximum flexibility in pressroom workflows. The cart easily transports ink chambers, ink jugs, sleeves, or anilox rollers with adjustable modular arms that can be configured for different job requirements. Sturdy shelves double as drip trays, keeping the work area clean during changeovers while providing organized storage. Built for narrow web applications, this cart streamlines setup, changeovers, and cleanup in one mobile, ergonomic solution.

MODULAR LEAN MOBILE

This cart is built to adapt with your workflow.
